

PAPERplus® - paper padding for perfect protective packaging

Wherever in the world you send your products - we want them to be well protected during transport! After all, you invest a great deal in their production: knowledge, time, money and much more. So do you really want to rely on packaging that cannot guarantee your product will arrive safely at its destination?

It is better to trust protective packaging solutions by Storopack. We work with you as a team to develop solutions that are suited perfectly to your individual requirements and are set for the future. It is better to trust protective packaging solution by Storopack. We work with you as a team to develop solutions that are suited perfectly to your individual requirements and are set for the future.

Advantages of PAPERplus® for protective packaging:

- **Wide range:** Individual solutions from a diverse range
- **Superior:** Outstanding cushioning effect and compressive strength
- **Efficient:** Creasing technology for maximum material utilisation
- **Reliable:** High availability through proven technology
- **Ergonomics:** E.g. touch panels, foot pedals and noise reduction
- **Image:** Paper has a favourable image with end customers
- **Environment:** Papers with EFC certification and no coated types.

Because of the wide choice of PAPERplus® systems, almost any protective packaging problem can be solved efficiently with paper padding. From a heavy gearbox to be shipped abroad, to a new smartphone delivery, PAPERplus® provides a solution combining maximum productivity and 100% protection. As an innovation-oriented service provider, Storopack continually adapts the range of machine systems, paper padding types and papers to the ongoing demands of the market.

Today's marketplace demands Greater Efficiency in-the-box

PAPERplus® Classic paper pad

PAPERplus® Classic is used for products in higher weight categories. The thick, multi-ply paper produces a pad suitable for cushioning products weighing up to several kilograms. PAPERplus® Classic is tear resistant and the paper pads can be easily shaped, making PAPERplus® suitable for a variety of packing techniques. The PAPERplus® pads provide the strength and durability to stabilise heavy objects and provide the bulk needed for superior cushioning and void fill.

Performance profile: Protects heavy weights

- Very high density and resilience
- Ideal for heavy packaged goods
- Typical use: gearbox parts
- Typical use: medical devices

Note: White paper option is also available

Perfect Protective Packaging System Integrations

Integration for high performance at every workstation

- **Thorough:** Comprehensive assessment of requirements.
- **Capable:** Application engineers produce the design and the implementation plan
- **Working Comfort:** Ergonomics, efficiency and effectiveness at every workstation
- **Turnkey:** Storopack own design and manufacturing.
